- Quarterly NoFlush BioSleeve and Urinals Service

Overview

School rang asking if installing NoFlush Urinal Systems and NoFlush Biological Bio-remediation Process would fix and eliminate the foul smells in the staff and Boys' urinals and the smelly toilet floors in Boys' Toilets. Students, parents and staff were complaining and reluctant to use some of the toilet blocks.

The Principal wanted a permanent solution and a third party to service and maintain the urinals and solution. Despite numerous attempts various cleaning companies and plumbers had not solved the long standing problem. 2 new waterless urinals installed in a new building were the worst offenders followed by the staff stainless urinal in a historic building onsite.

We reassured the Principal and Maintenance Manager that we would fix and eliminate their foul urinal odours and smelly Boys' Toilet Floors problems. **Yes, our Money Back Guarantee was genuine, and has never been invoked by any of our clients.**

After the On-site Assessment and Consultation and acceptance of quotation, we undertook the works required and successfully eliminated the putrid urinal odours and smelly boys' toilets. We provided onsite Cleaner training sessions.

They were so please with the results they requested that we also provide an ongoing NoFlush BioSleeve replacement and urinal service.

Results

NoFlush Urinal Systems and NoFlush Biological Bio-remediation Process installed in the historical staff urinal, upper boys' stainless steel urinal, 2 new 3m stainless steel urinals and 2 new ceramic waterless urinals; successfully fixed and eliminated the foul urinal odours and smelly boys' toilet floors.

NoFlush Urinal Solutions retained to manage and provide ongoing quarterly NoFlush BioSleeve replacement and urinal service.

Students, parents and staff were complaints have turned into compliments
